Docket No. ST999111
Firm No. 0055.0013

Claim 1

1. (Previously Presented) A method for displaying data on a display monitor under control of a computer, comprising:
retrieving one or more records matching a search criteria, wherein each record includes at least one field of data; and
when a field of data includes a separator indicating that there are multiple values for the field,
displaying in a page a first portion of the field of data and a graphical element indicating that there is a second portion of the field of data within a display area of the page; and
enabling the page to selectively present the first and second portions of the field of data in response to user input, *passing over the graphical element*

the Examiner will consider whether the primary reference (Shell et al) specially teaches "passing

Serial No. 09/478,974
Docket No. ST999111
Firm No. 0055.0013

REMARKS

Applicant would like to discuss the rejection of claim 1 and Seki et al. (U.S. Patent No. 6,570,597) in view of Barker et al. (U.S. Patent No. 6,141,659).

Applicant submits that the combination of the Seki and Barker patents teaches multiple icons representing a document and each object in the document, while Applicant's claims are directed to displaying a first portion of a field of data and a graphical element indicating that there is a second portion of the field of data when there are multiple values in the field of data.
